

Quanstar Digital Signage

Captivate Indoor Audiences
through Comprehensive Display Solutions

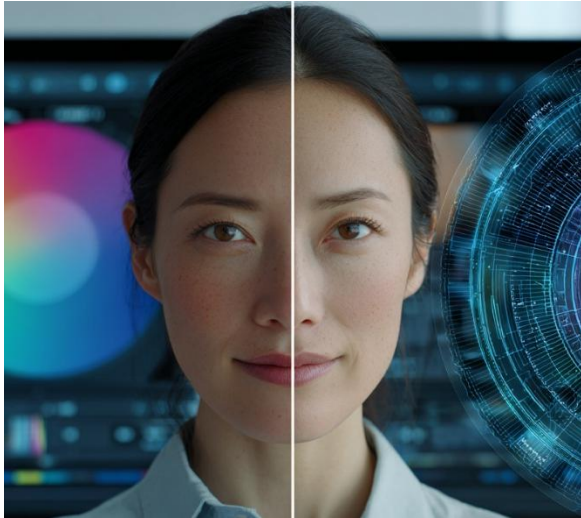

Captivate Every Visitor with Quanstar's Full Suite of Indoor Display Solutions

In an era where indoor engagement defines customer satisfaction, high-resolution visual displays are now essential. Quanstar's Display Series provides end-to-end solution that enhances clarity, streamlines deployments, and simplifies control, helping business deliver immersive content with minimal effort.

Intuitive Touch, Effortless Performance

Deliver Exceptional Realism

While conventional displays often distort skin tones with an unnatural red hue. Our digital signage screens mitigate oversaturation with **98% sRGB coverage**, guaranteeing colors are vibrant yet authentic. Furthermore, they maintain consistent gradation and color fidelity across a wide **178° viewing angle**, ensuring a true-to-life representation for every viewer in the room.

Innovation at Your Fingertips

Built with a durable, high-sensitivity capacitive touch panel, our smart digital signage delivers smooth, and precise interaction. It supports **20 simultaneous touch points**, allowing multiple users to collaborate naturally. With a rapid **<10ms touch response** and **±1mm accuracy**, every gesture is registered with instant, pinpoint precision, making it feel as intuitive as your favorite tablet.

Unlimited Layout and Formats

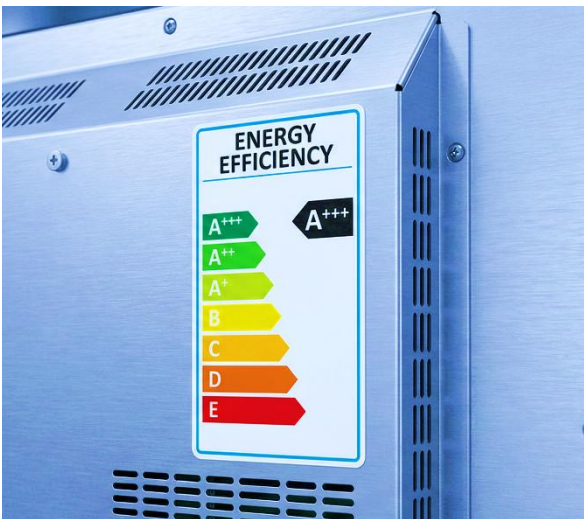

Go beyond the flat screen. Quanstar curved designs (up to 6,000R) create an architectural statement that breaks the visual monotony of any space. This versatility unlocks new engagement possibilities, allowing you to guide customer flow and focus attention precisely where you want it.

Designed for Impact, Built for Reliability

Reliable and Efficient Operation

Designed for nonstop operation, Quanstar's LED digital signage lineup provides brilliant, reliable visuals with smart energy-efficient engineering. With a high-brightness display up to **500 nits** to combat glare and a lifespan of up to **60,000 hours**, it delivers years of continuous, crystal-clear service.

Enjoy Top-Tier Performance, Minimum Energy Use.

Built for 24/7 reliability, our digital signage combines vibrant, sunlight-readable displays with intelligent power management. Achieving a top-tier **Energy Grade Level 1 rating**, it drastically reduces operating expenses while delivering unwavering performance in any environment.

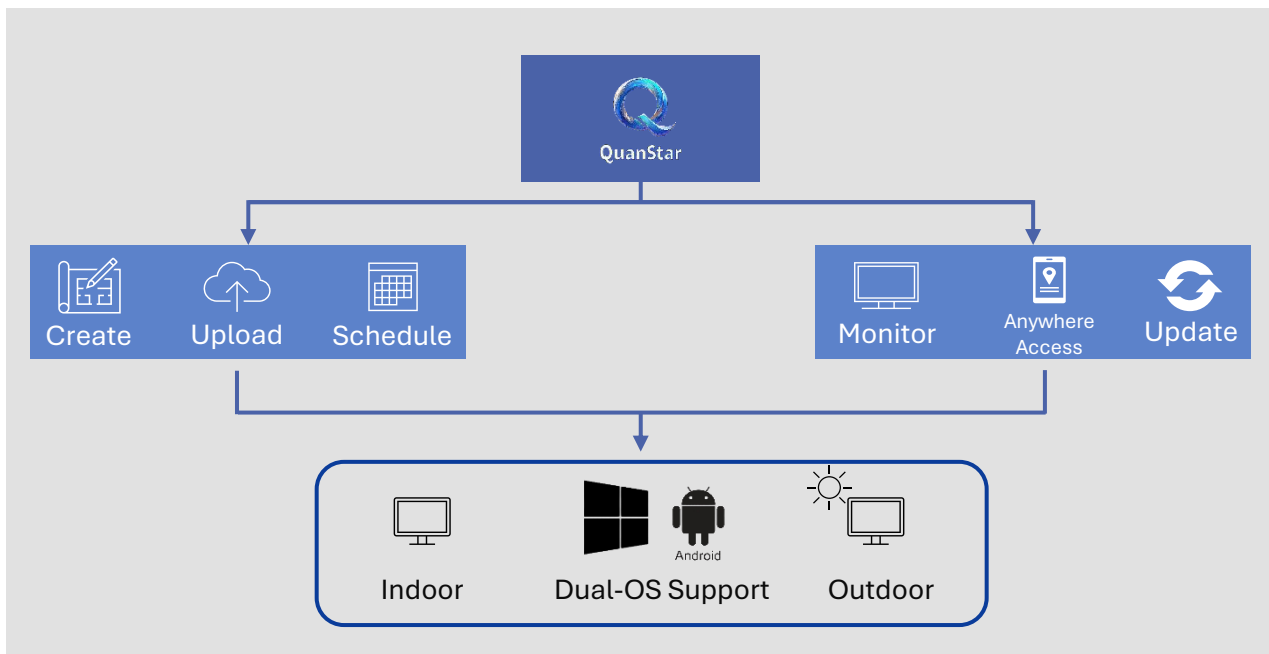

Experience a Smooth, Seamless Setup

Quanstar's design ensures a perfectly smooth installation in any environment. With universal hardware, broad voltage support (100-240V), and an intuitive, plug-and-use ecosystem, setup is fast and simple. This end-to-end simplification reduces installation time and total cost of ownership.

Seamless Control, Smarter Operations

The Quanstar Digital signage, driven by Central Management System (CMS), turns complex content management into a simple task. Enjoy crystal-clear, true-to-life visuals while a powerful backend gives you total visibility. Proactively monitor and resolve issues remotely, guaranteeing a brilliant, uninterrupted viewing experience.

Streamline Operations from a Single Dashboard

Quanstar delivers the ultimate nerve center platform. Go beyond basic management and orchestrate your entire display network from a single dashboard. Seamlessly create, schedule, and deploy stunning content across all your displays from any device. With Quanstar's proactive visibility, you can monitor performance, troubleshoot issues remotely, and push firmware updates ensuring optimal performance and clarity, everywhere, all the time.

The Ultimate Solution Angle

Manage with Precision

Remotely program and modify settings for one display or a thousand.

Deploy with Ease

Push compelling, true-to-life content to any screen, from anywhere.

Operate with Confidence

Proactively monitor system health, troubleshoot in real-time, and ensure peak performance with remote firmware optimization.
